Our services

CYBER SECURITY

In today's world, cybersecurity is very important because of some security threats and cyber-attacks. For data protection, many companies develop software. This software protects the data. Cybersecurity is important because not only it helps to secure information but also our system from virus attacks.

DIGITAL MARKETING

Boost Your Organic Ranking with Right & Proven SEO Strategies

Why Our Clients Bank on Our SEO Effort

- Steady rising in search results based on thorough keyword search
- Excellent at new-age voice-based search optimization for platforms like Alexa, Google, etc
- The right balance of on-page and off-page optimization
- High-quality content.

On-Page Optimization

- Meta Tags Optimization
- Canonical Tag
- Heading Tags in Content
- Google Sitemap Creation
- Web Page Weight/Rank
- Anchor Text
- URL Renaming/Re-writing
- Website Audit
- Header Keyword Optimization
- Footer Keyword Optimization

Off-Page Optimization

- Submission to Search Engine
- Directory Submission
- Deep Linking
- Inbound Links
- Social Bookmarking
- Press Release Submission
- One-Way Link Building
- Two-Way Link Building
- Three-Way Link Building
- Competitor Analysis
- HTML, Logo, and Its Importance

MIDDLEWARE

- We provide the functionality to connect applications intelligently and efficiently so that you can innovate faster.
- It acts as a bridge between diverse technologies, tools, and databases so that you can integrate them seamlessly into a single system
- The single system then provides a unified service to its users.

KIOSK

Our Purpose

To give a hassle-free, highly secured self-service solution to citizens for various Government Services and make the transaction safe , speedy, and accurate with enhanced experience

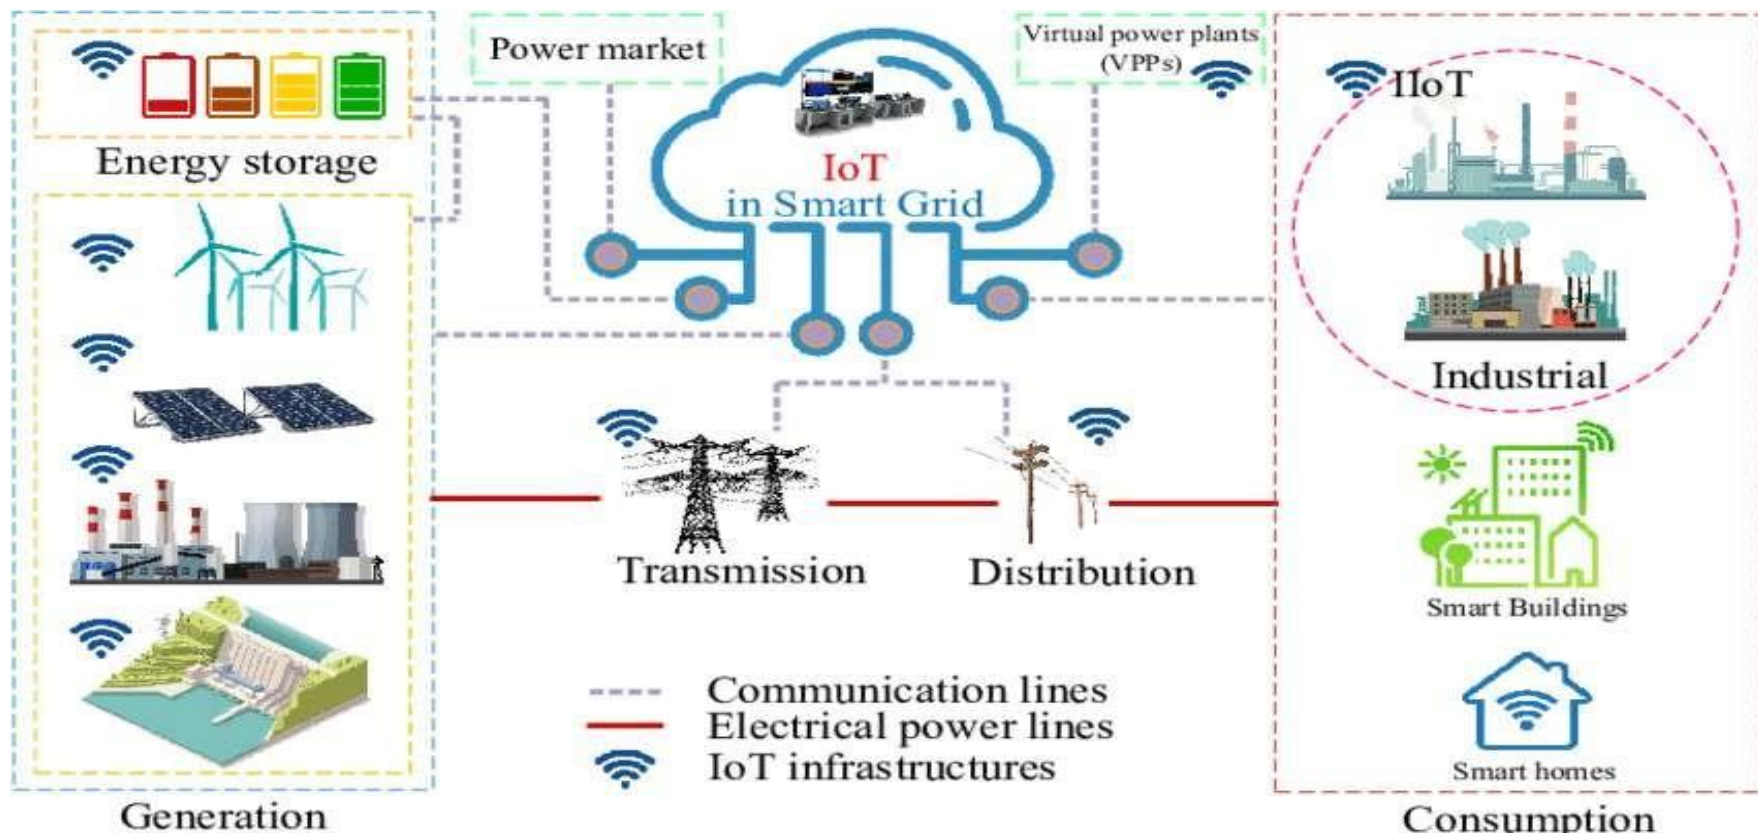

Current Situation and challenges

- Various Taxes and fees to be paid
- People need guidance on how services can be availed
- People come on the counter and stand in a queue
- Cashiers collect fees and taxes
- In case some documents are needed then it takes time to collect
- So second visit is required as per timelines
- Analytics never displayed

IOT GRID

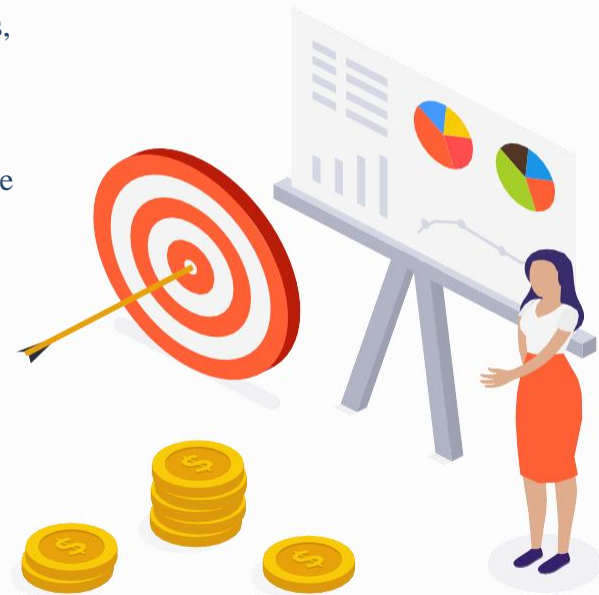

RF ANALYSIS SOFTWARE

TETPL offers end-to-end, high-performance radio frequency (RF) simulations of wireless devices and systems for aerospace, automotive, communications, consumer electronics, internet of things (IOT) and other applications.

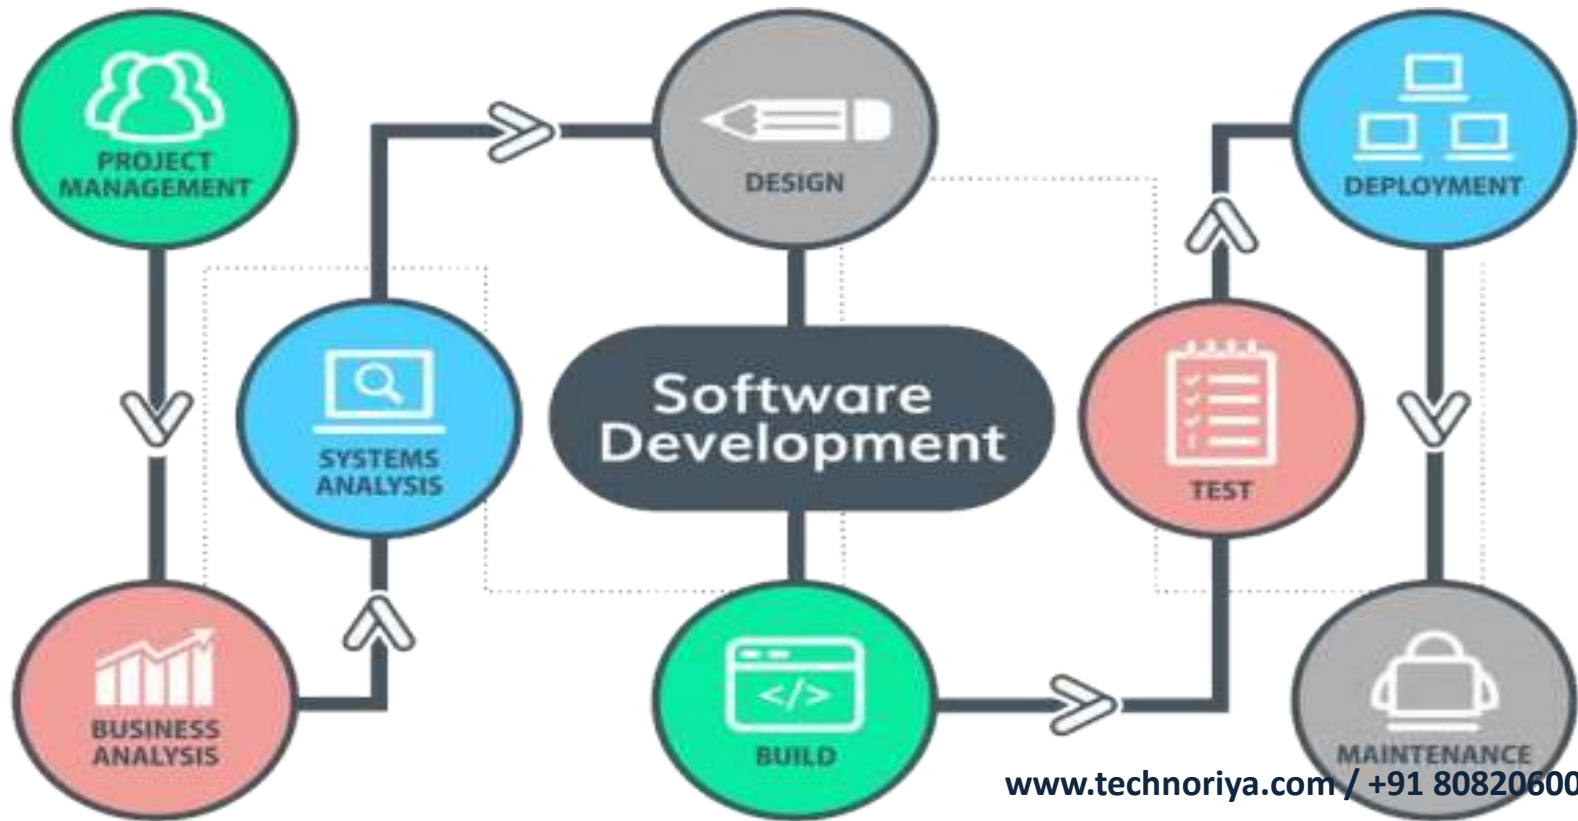

TETPL system, provides a general-purpose library of wireless RF systems and propagation models, along with diagnostic tools needed to quickly identify and mitigate root causes of radio frequency interference (RFI), which impact the performance of wireless systems.

Key features:

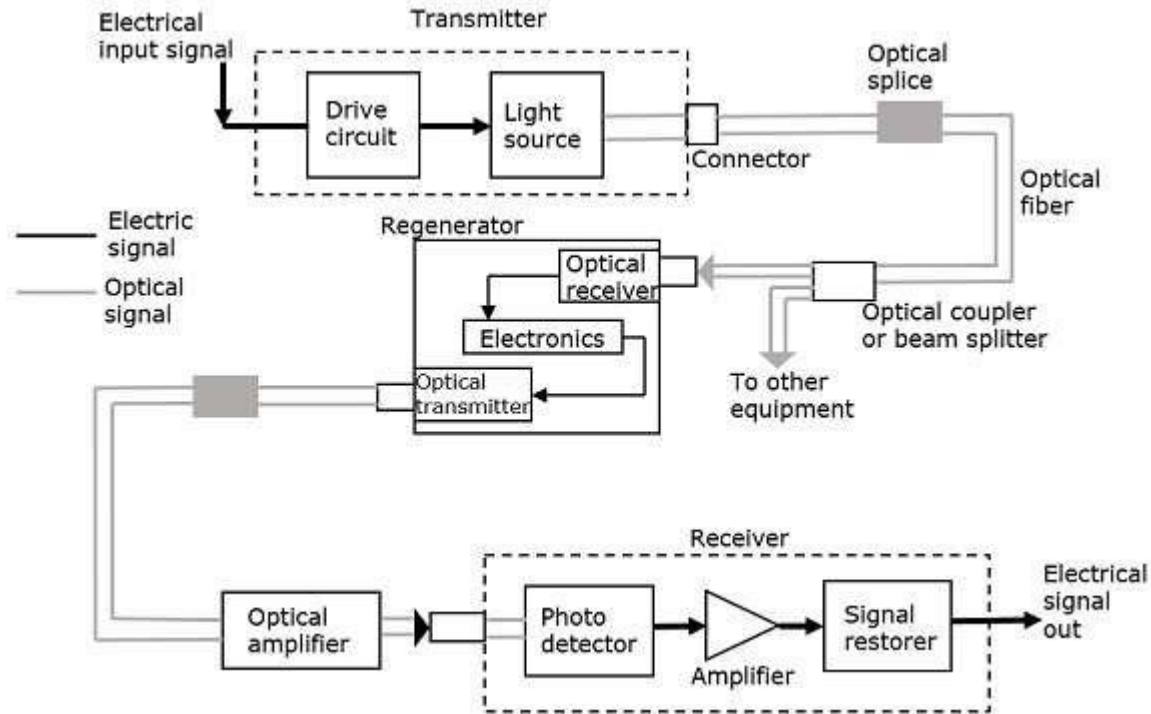

- Rf link budget analysis.
- Built-in rf radio and component libraries.
- Ultrafidelity behavioral radio models. Built-in wireless propagation models.
- Rf cosite and antenna coexistence analysis.
- Automated diagnostics for rapid root-cause analysis

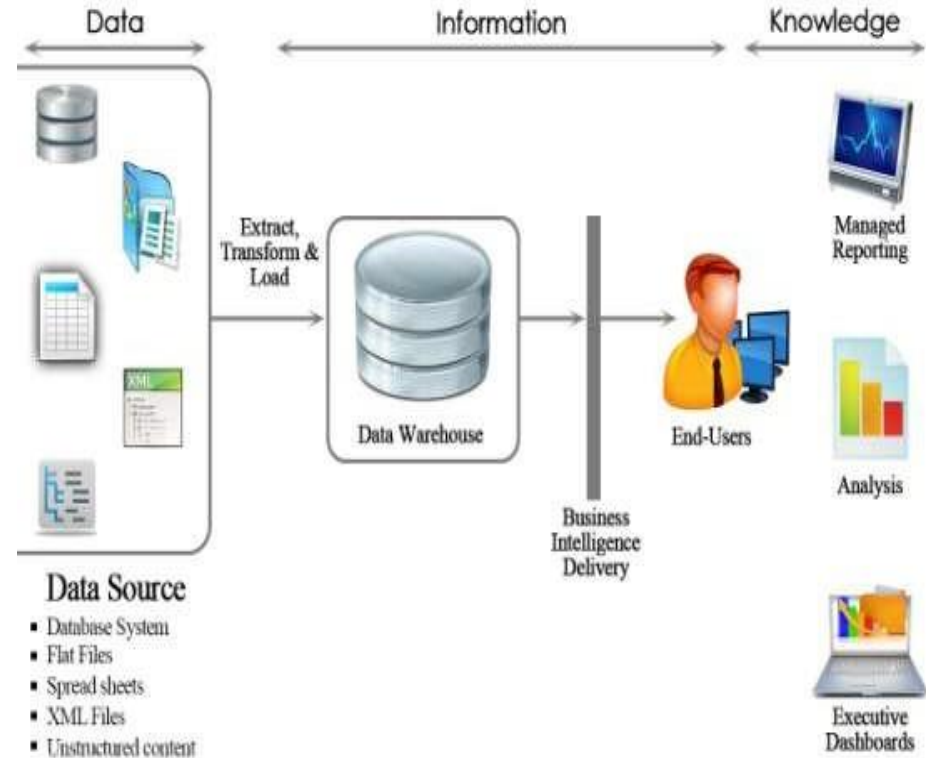

OPTICAL REPEATERS

TETPL offers sap BI/HANA to provide organization with a flexible route to sharing information that available for the entire organization.

Key features:

- ❖ Information at fingertips faster and modular scalable
- ❖ Data reliable unified information flexible
- ❖ Integration data distribution online/offline

TETPL offers **SAP FIORI** the design language that brings great user experiences to enterprise applications. Based on user roles and business processes, SAP FIORI simplifies doing business.

SAP FIORI elements (formerly known as smart templates) provide a framework for the most common application patterns.

The application team selects the relevant floorplan and adds semantic and structural data using metadata annotations.

The framework generates the application screen.

SAP FIORI elements ensure design consistency and compliance with the latest design guidelines, while reducing the amount of frontend code needed to build SAP FIORI apps.

Products & Intellectual Property

- It has a whole suite of SAP Add-on products, reusable components and accelerators in its knowledgebase for shorter implementation cycles and rapid deployment.
- An Integration platform for IoT devices to connect to SAP which provides streaming analytics and live visualization of data
- Complete knowledgebase and configuration set for 35 Countries' payroll processing and statutory reporting
- Several templates for data conversion, documentation (SEN), testing plans and templates, validation
